Minutes to Learn About ARTILUX

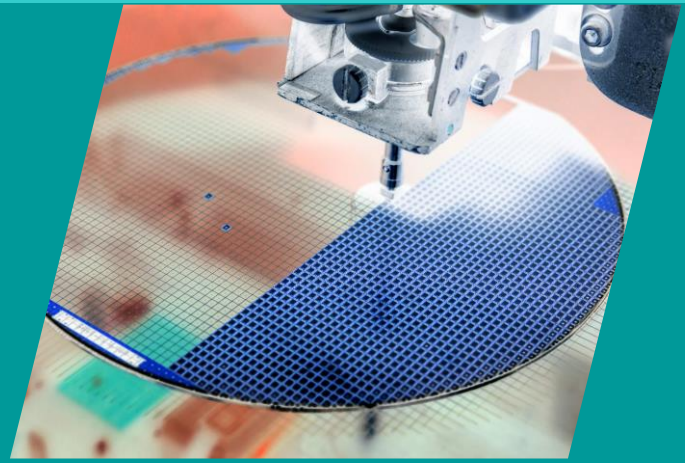

01.

The creator of GeSi technology platform to enable waves of high performance, cost-effective and highly integrated product innovations for shortwave infrared (SWIR) sensing, imaging and communications.

Accumulating over 300 patents and received global academic and industry recognitions including IEDM 2018, ISSCC 2020, Image Sensors Europe 2020 and more.

02.

03.

Comprehensive product portfolios covering application range from mm to km : Aware Series for biometric sensor, Explore Series for 2D/3D ToF camera, Foresee Series for automotive LiDAR, and Connect Series for all optical HDMI 2.1 and USB4 as the top 2 consumer fiber communication IC provider with millions of unit shipment and growing.

Headquarter in Hsinchu Taiwan with branch offices across Asia, US and Europe, with strong ecosystem partners including top CMOS foundry, leading III-V laser companies, and tier-1 companies in the automotive and industrial market segments.

04.

05.

Mature CMOS based technology platform to unlock endless possibilities related to SWIR sensing and imaging including digital health, consumer electronics, metaverse, agriculture, industrial, autonomous driving and more.
